Information Security Officer

Description

Taurus is the European leading digital asset infrastructure provider for banks, corporates and private companies. Using blockchain technology, its platform covers cryptocurrencies, tokenized securities, tokenized assets (such as NFTs), digital currencies, and stablecoins.

The team is looking for ambitious and driven individuals to support Taurus's fast global growth.

Responsibilities

- Conduct internal compliance and security assessments.
- Create and improve internal policies and standard operating procedures.
- Perform security due diligence assessments of third-party solutions and organizations.
- Organize third-party assessments of Taurus' technology and infrastructure.
- Contribute to compliance audits undergone by Taurus (concerning FINMA license and ISAE 3402 controls).
- Contribute to the security roadmap and strategy of Taurus' products and services.
- Participate in contingency planning activities (BCP, DRP tests, incident response procedures, and so on).
- Participate in threat intelligence collection and analysis.

Qualifications

- Security mindset and culture.
- Irreproachable personal integrity and ethics.
- Intellectual rigor with a healthy dose of pragmatism.
- Good knowledge and command of technological tools.
- Familiarity with legal and regulatory compliance frameworks.
- Good written and spoken command of English, and preferably some knowledge of French or German.

Job Benefits

- An opportunity to work at the intersection of digital assets and finance
- A skilled and experienced team, including world-renowned experts
- A fast-paced learning environment, entrepreneurial spirit and team spirit
- A great moment to join as the company grows and expands
- State-of-the-art technology and IT infrastructure
- Hybrid remote work and flexible working hours
- Fun team events

Hiring organization

Taurus SA

Taurus is a global-leader in enterprise-grade digital asset infrastructure with roots in Switzerland.

Market leadership:

Taurus has >50% market share in its home market in Switzerland, the most competitive in the world. Globally, Taurus is entrusted by the full spectrum of financial institutions – systemic banks, investment banks, crypto banks, private banks, universal banks – financial market infrastructure providers and core banking systems. In production.

Product leadership:

Taurus has developed the most advanced and most complete digital asset platform in the industry which goes “way beyond” crypto-currency custody. No one else besides Taurus, is able to empower financial institutions to issue/onboard, manage, and book “any type” of tokenised securities and digital currencies. On any standard. Independently. With the same platform.

Technology leadership:

Taurus masters the full technology stack and 70% of the staff is made of engineers. The teams believes this is a core capability and a strong hedge against tech disruptions in an industry that is young and moving fast. The products clients use are 100% built by Taurus and are at the forefront of what exists in the market with several patent-pending inventions. Anticipating protocol upgrades, adding “complex” new

protocols, new signature curves or strengthening HSM-security, operating nodes+indexing is totally controlled by the engineering teams. This makes Taurus future-proof, execute fast and a long-term, partner to the clients.
