## Local Cyber Security Lead

### Responsibilities

Supported by the London-based SOC, you will be representative of the security team on-site and will be taking up a key role in keeping Copper secure. As the local face of cyber security, you will take a local lead on everything from threat hunting to incident response to security evangelism.

Reporting to the Head of Security Operations, you will be joining the team at an exciting time and helping us build out the security capabilities to a world-leading standard.

### Qualifications

- Experience as a senior security analyst
- Experience with providing and coordinating the analysis of network and endpoint events
- Experience in incident response processes
- Experience in vulnerability management processes
- Building playbooks for incident analysis and handling
- Knowledge of security methodologies and technical security solutions
- The ability to coordinate an investigation
- The ability to tune and/or develop detection rules in SIEMs
- The ability to communicate effectively both verbally and in writing with both technical and non-technical staff
- We use a range of technologies across the business, but experience working with cloud platforms is valuable, as is any experience of Microsoft Sentinel/Defender and CrowdStrike Falcon
- Experience working in a fast-paced, fast-growing, global environment

### Hiring organization

Copper.co

Copper is transforming how institutional investors engage with digital assets, providing market-leading infrastructure in addition to custody, trading and prime brokerage solutions.

Copper's award-winning custody application leverages the genius of multi-party computation (MPC) encryption and can be configured to support cold, warm, and hot wallet solutions.

Asset managers are further protected by our pioneering ClearLoop network, which enables off-exchange trading and settlement at tier-1 digital asset exchanges. An offering enhanced by the availability of uncollateralized lending.

Copper's secure wallet architecture is available as a standalone application, a mobile app, and a browser extension for smart contract signing.
